Developer

- Good knowledge of software design, implementing OO Patterns, Data Structures and Algorithms
- Basic knowledge of software development processes, methodologies and life cycles
- Ability to write clean, readable, maintainable code
- Languages: Java, Dart, C++, JavaScript, C#, SQL, Solidity

Personal

I love to play soccer and have played in different leagues ever since I was 5. I was a part of App State's Quidditch -- as in the fictional Harry Potter game-- varsity team as their seeker. I am an avid board gamer, always looking to grow my collection and the people I game with. I am growing my skills as a 3D designer and printer, working with resin and filament printing.
